

# 图形界面篇

日成蝶—Windows API 编程入门

七日做茧，一朝成蝶！

主讲：袁春旭

# 窗口初识

# 窗口初识

```
#include <windows.h>

int WINAPI WinMain(HINSTANCE hInstance,
                   HINSTANCE hPrevInstance,
                   LPSTR lpCmdLine,
                   int nCmdShow)
{
    //显示一个对话框
    MessageBox(NULL, "hello", "first window", MB_OK);
    return 0;
}
```

# 窗口初识

```
#include <windows.h>

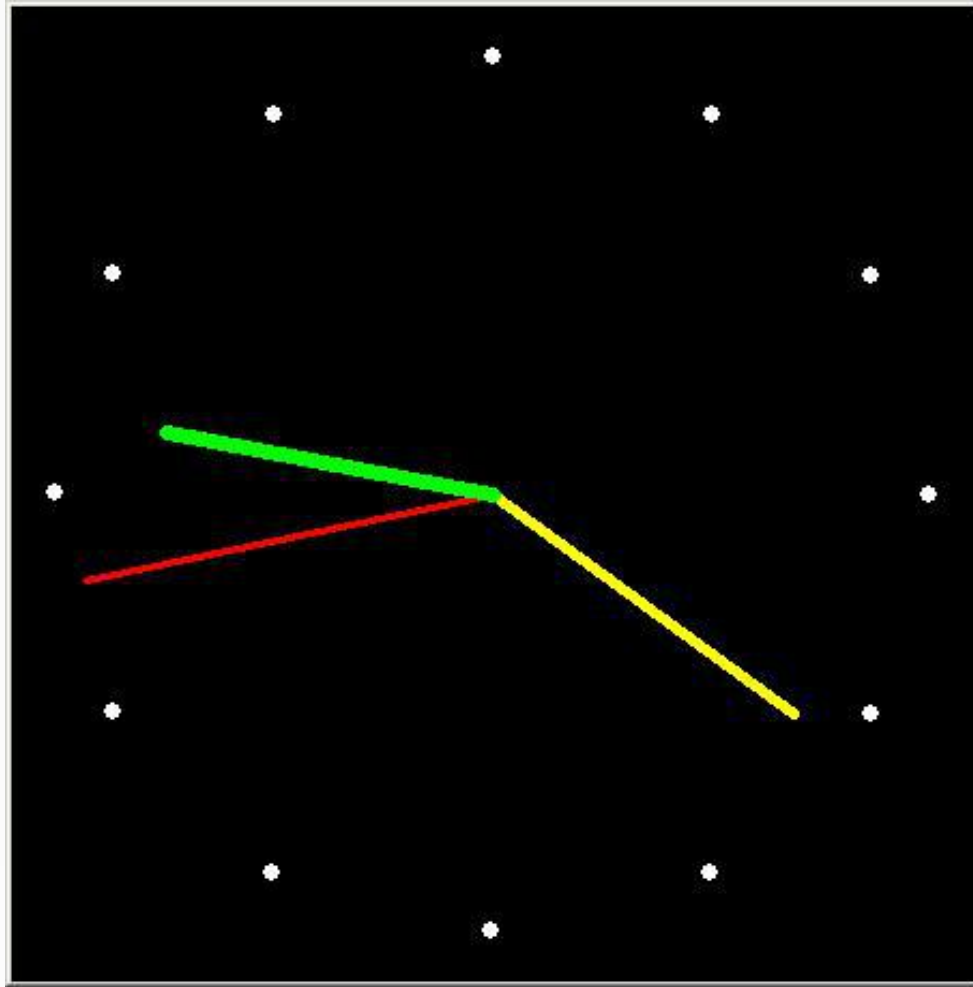

int APIENTRY wWinMain(HINSTANCE hInstance,
                      HINSTANCE hPrevInstance,
                      LPWSTR lpCmdLine,
                      int nCmdShow)
{
    //显示一个对话框
    MessageBox(NULL, L"hello", L"first window", MB_OK);
    return 0;
}
```

# 窗口初识

```
#include <windows.h>
int main(int argc, char *argv[])
{
    HWND hWnd = FindWindow(NULL, "无标题- 记事本");
    if(NULL != hWnd)
    {
        //对记事本程序发送消息
        SendMessage(hWnd, WM_CLOSE, 0, 0);
    }
    return 0;
}
```
